# DESKTOP APPLICATION

HELABIMA An App Powered
With JavaFx With Spring Boot
As The Backend Service

LET'S EXPLORE

HELABIMA

A Desktop Application Where Villa Management Got Ease And Handy

API BASED APPLICATION

Seamlessly integrate and exchange data using standard HTTP methods. Tested and validated using the Postman client for easy API testing and development."
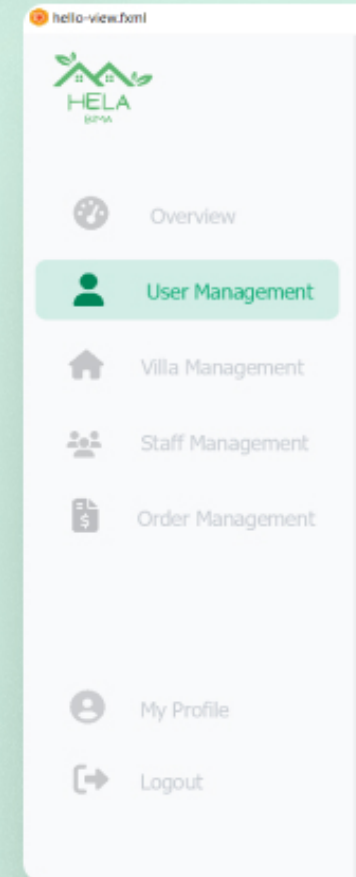

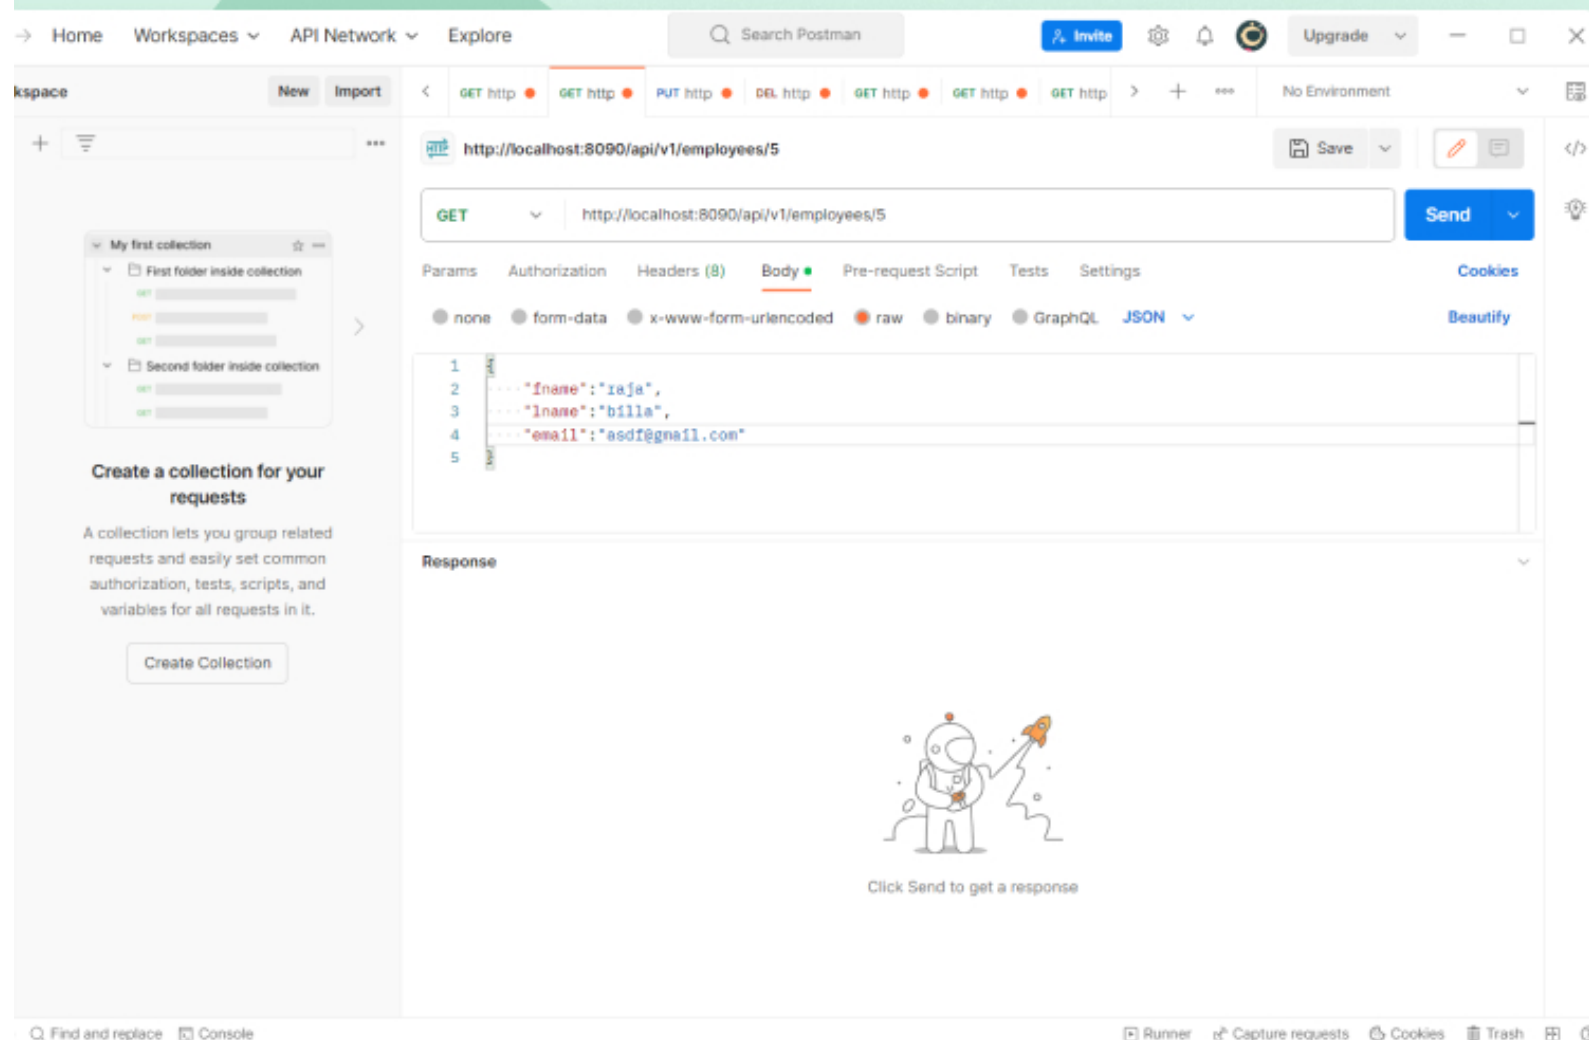

INTERACTIVE UI/UX

Immersive user experience with our visually stunning interface created using SceneBuilder. Experience the perfect blend of form and function for an exceptional UI/UX design.
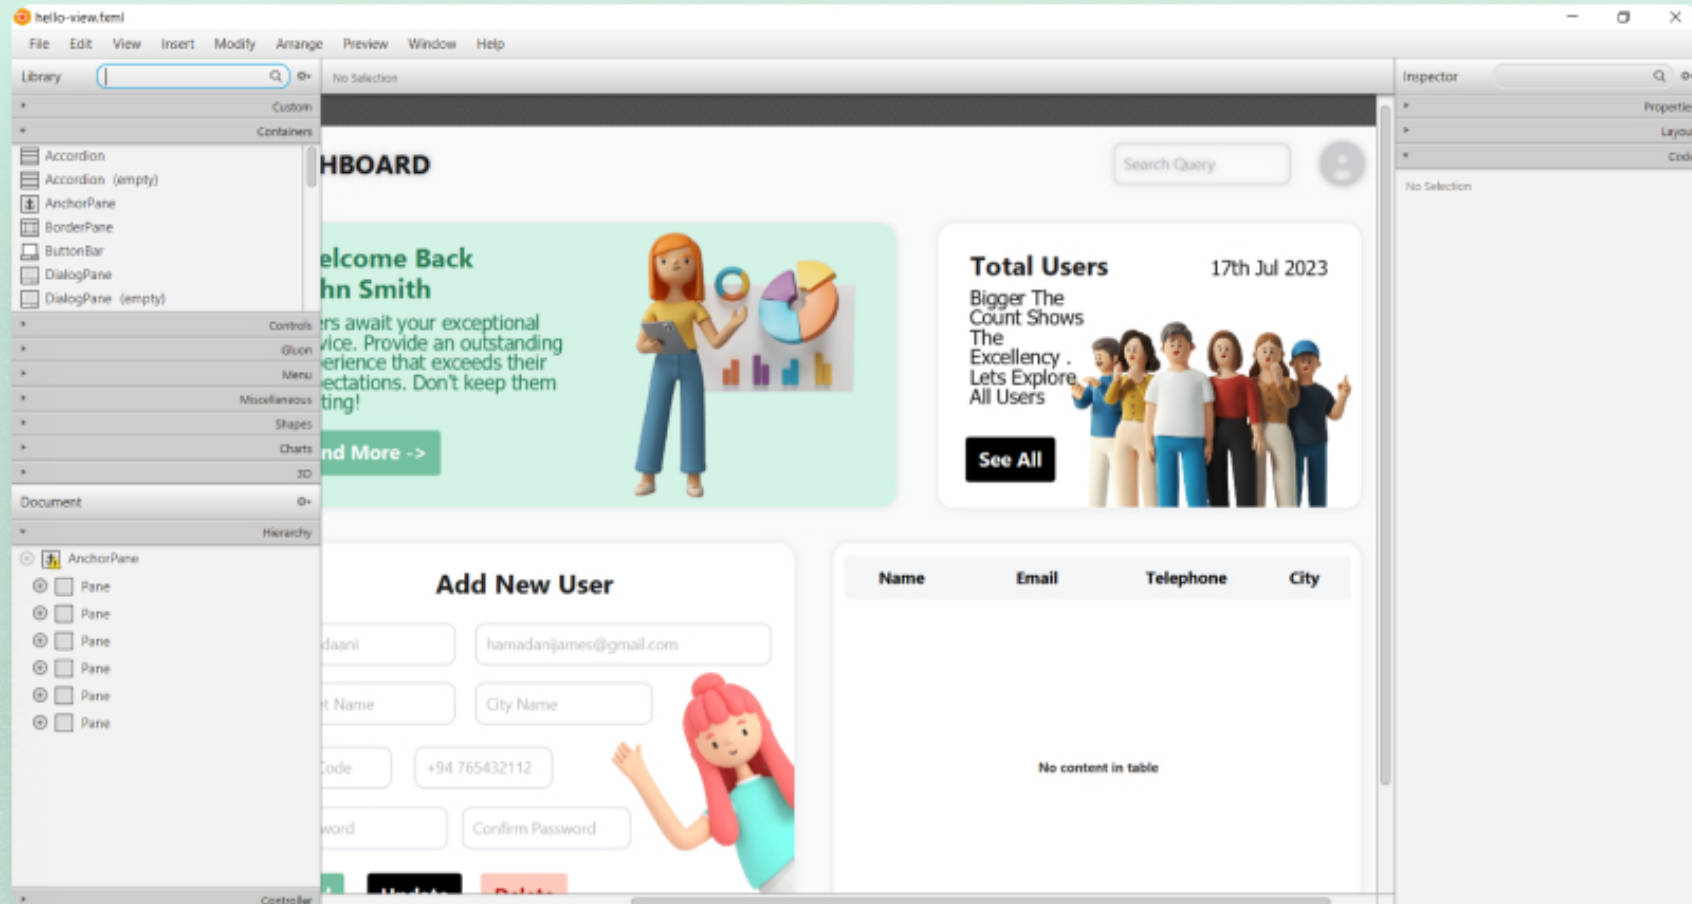

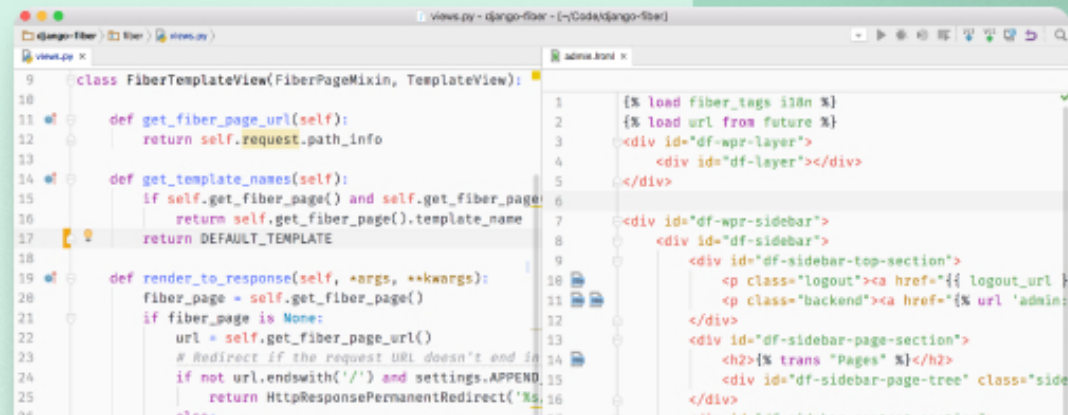

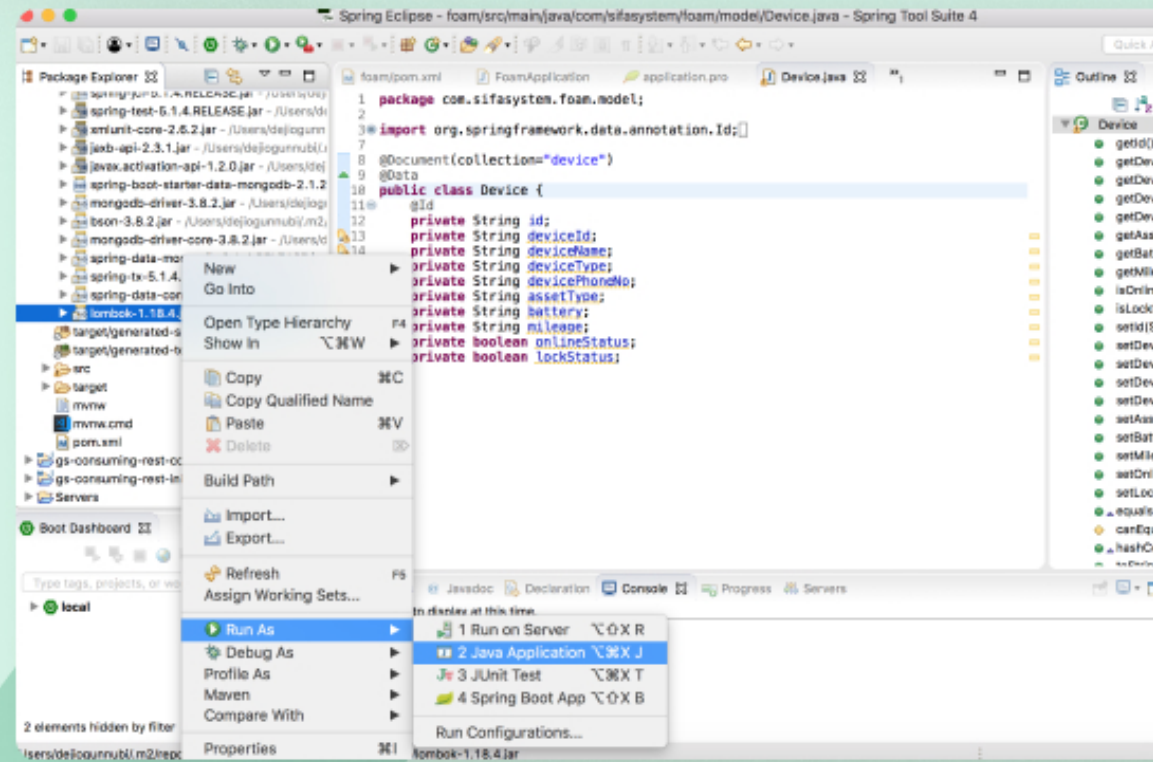

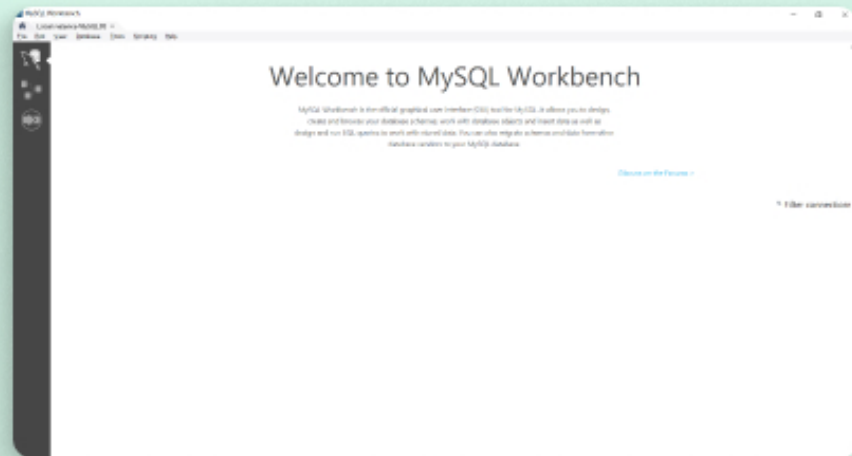

TOOLS AND TECHS

Powered by Spring Boot, Spring Tool Suite, IntelliJ IDEA, and MySQL, our app offers a seamless user experience with robust backend functionality.

DISCLAIMER

Focused on building a standalone Spring Boot app with a robust REST service, prioritizing backend functionality over UI/UX.
